

New Generation MR4 Super-Pulsed Laser Seminar
Information, Indications, Uses & Benefits
Hands-On Training, Use of Laser Therapy, & Teaching session

Date: NOVEMBER 7, 2014 (Friday) Time: 1:00pm – 3:00pm

Location: Kosim Education Center, 135 Sparks Ave, Toronto, ON M2H 2S5
(Victoria Parks & south of Steeles Ave East)

Speaker: David Groves, Super-Pulsed Laser Expert

Space Limited - \$50.00 Fee or \$40.00 (Early-Bird register before Sept 24, 2014)
Receive FREE portable TENS stimulation unit for each register

Agenda:

- History and background of Lasers & how lasers work
- Introduction to the basic physics of laser- Animation of Fibroblast response
- Introduction to light /tissue interactions:
How it works, cellular pathways -cellular response to light & mechanisms of action
- Review of literature / clinical data
- The different wavelengths: IR & Visible Red& Blue Light / LED's vs Laser
- Super Pulsed Lasers-Power output, Peak Power, Frequency, Duration,
- Cold Laser vs. Class IV lasers
- Frequencies and sequenced frequencies
- Electrical Stimulation and TARGET Technology- Bio-feedback
- The conditions lasers are effective on: the research and current practice.
- Oshiros Priority Principle
- Safety Issues & Contraindications / Health Canada
- Protocols for treating various conditions - soft tissue & deep musculoskeletal
- ROI and Clinic Integration- Leasing VS Purchase
- Practical and Operation - demonstration and hands-on with equipment.

Registration Here: * Please email back to sales@kosim.ca or fax to 1-416-502-2808
