

POSTURAL OCULAR NEURAL SYSTEMS (PONS)

The genesis of the PON system is propagated from an innate purpose and desire to advance the knowledge and technical certainty of the doctors in our profession with the vision to empower and improve the quality of our patient's lives.

Part One – October 3 - 4

Dr. Horseman seminar will include an overview of functional neurology as well as spinal biomechanics. The seminar will be presented in practical modules with hands on therapeutic treatment protocols including: Posture analysis and correction, Balance testing and correction, Gait analysis and correction, Inner Ear analysis and therapies, Vestibulo-Oculo reflexes, Introduction to Eyalights and Eye movement analysis and advanced neurological rehabilitative protocols

Part Two – November 7 - 8

Dr. Horseman seminar will include an overview of functional neurology as well as spinal biomechanics. Introduction to multiple sensory and proprioceptive strategies to rehabilitate the brain. Update on the latest concussion protocols and management. Many case studies and live patients to make these concepts become dynamic and practical.

Location: Quality Hotel and Suites Toronto Airport East
2180 Islington Ave. Toronto, ON

Instructor: Dr. Ian Horseman, DC

For the past 17 years I have had the honor to work with some of the brightest doctors in our profession.

We have created an integrated system of advanced neurological protocols and merged them with practical postural correction principals to develop PONS.

PONS in Latin means gateway which has been the focus to merge some of the best and proven methods and present them in a easy to implement system.

Learn how to better deal with patients suffering from many conditions such as concussions fibromyalgia headaches anxiety and stress through these advanced neurological protocols.

In part two learn proven methods to improve posture.

Dr. Ian Horseman
